

SUPERIOR FACTS :

Lake Superior is the world's largest freshwater lake by surface area.

Lake Superior is 350 miles long, 160 miles wide & covers **31,700 square miles**, or roughly the size of Maine.

Lake Superior holds 10% of the surface freshwater in **all the world!** Of all the water on Earth, only 3% is freshwater.

Because of Superior's depth of 396 meters (or 1,300 feet), an average drop of water remains in the lake for about **191 years**. It takes **400 - 500 years** for a complete water change!
